DETAILED ACTION

This paper is filed in response to the board decision rendered on 9/4/08.

Allowable Subject Matter

1. Claims 1 thru 15, and 21 thru 32 are allowed. The following is an examiner's statement of reasons for allowance: The references of record, either singularly or in combination, do not teach or suggest at least a method of forming a field effect transistor, the method comprising: forming a drain region and a source region adjacent said implantation mask, said drain and source regions each having a top surface located above a top surface of said crystalline semiconductor region; removing said implantation mask to expose a surface area of said top surface of said crystalline semiconductor region; forming a gate insulation layer on said exposed surface area of said top surface of said crystalline semiconductor region.

Regarding claims 22-24, the references of record, either singularly or in combination, do not teach or suggest at least a field effect transistor, comprising: a drain region formed on said top surface of said semiconductor region and extending along a lateral direction and a height direction; a source region formed on said top surface of said semiconductor region and extending along said lateral direction and said height direction; and a gate electrode formed above said top surface of said semiconductor region and extending along said lateral direction and said height direction, said gate electrode separated from said top surface of said semiconductor region by a gate insulation layer, said drain and source regions extending along said height direction at least to an upper surface of said gate electrode.

Regarding claims 25-32, the references of record, either singularly or in combination, do not teach or suggest at least a method of forming a field effect transistor, the method comprising:

forming a recess; forming an implantation mask in at least said recess; forming a drain region and a source region by performing at least one ion implantation process to implant ions into said semiconductor layer adjacent said implantation mask, removing said implantation mask to expose said bottom surface of said recess; forming a gate insulation layer on said exposed bottom surface of said recess.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
